T40
Transport trolley with
optional sliding basket
and Wanzi Sidebox

01.07 Transport trolley T40

■ **The universal transporter with one of the largest platforms** – for heavy loads and large quantities of goods. Fitted with wire or wooden platform. One important convenient feature is the fifth castor wheel, which allows you to steer the T40 easily and turn it on the spot. This makes the trolley run in a stable, straight line regardless of its load.

Standard design

Rack made of oval pipes with safety bars. Handle with plastic handle holders. Wire platform, reinforced with upright flat plates and all-round protection frame made of profiled tubing. Plastic elements and profiles for noise reduction. Narrow-meshed shopping basket, protected by oval pipe frame.

Finish: high-gloss galvanised, chrome-plated and transparent plastic powder coating.

Castor wheels: Wanzl bonded-on swivel castors, castor Ø 200 mm, rubber tread. 5th Castor, bonded-on, castor Ø 125 mm.

High loading capacity

Extremely sturdy frame construction for high loads over long periods. Cushioning plastic profiles for quiet operation.

Advertising (optional)

Always in sight: the handle with customised advertising insert, screen-printing below transparent plastic sheathing.
